Campaign comparison

Comparison design	Lift ($)	95% interval
1 · Targeted vs untargeted	$34.77	$31.81 to $37.73
2 · Unmatched DiD	$1.68	($0.01) to $3.38
3 · Match on recent pre-period	$6.27	$3.07 to $9.48
4 · Match on earlier weeks	$2.95	($0.74) to $6.64

USD / household / week; 95% intervals. Blue = earlier-match design. Amber = interval includes zero. Pilot before scaling.

Randomized email test

Arm	Lift ($)	95% CI
Mens E-Mail	$0.77	$0.48 to $1.04
Womens E-Mail	$0.42	$0.18 to $0.70

Separate randomized retailer test; two-week spend per assigned customer.

Retailer-funded discounts (USD)
$783.8K

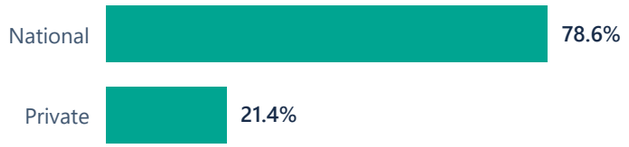

Share of shelf value sold on discount
55.6%

Distinct products purchased
67,860

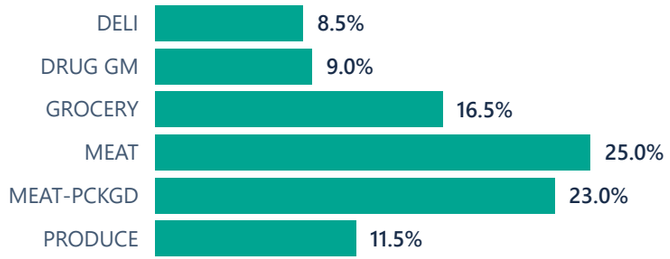

Top 6 departments by sales

National vs private: known-brand sales

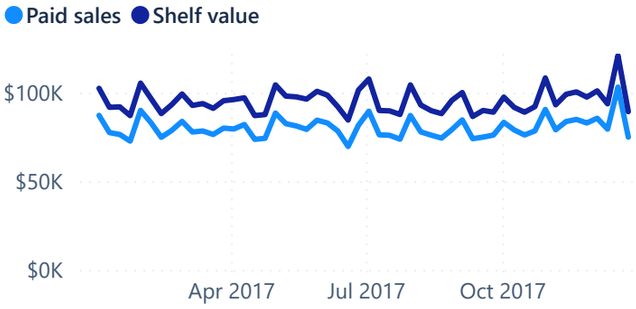

Discount depth: top 6 departments

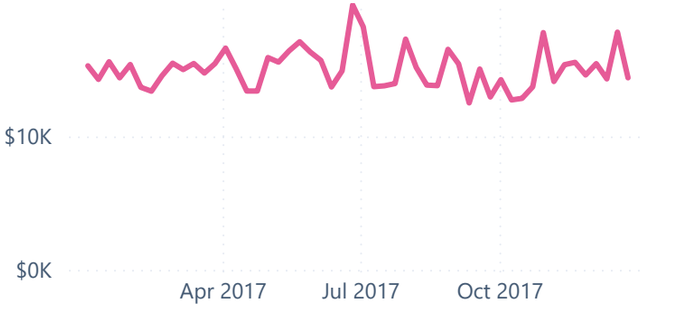

Top 6 categories by sales

Paid sales vs reference shelf value

Retailer discounts by week

KPIs include partial week 1; weekly charts use weeks 2-53. Ranked charts show the top 6 in the selection. Hover for details.

Compare the evidence before scaling

Grocery campaigns are observational. The email experiment is randomized and comes from a different retailer.

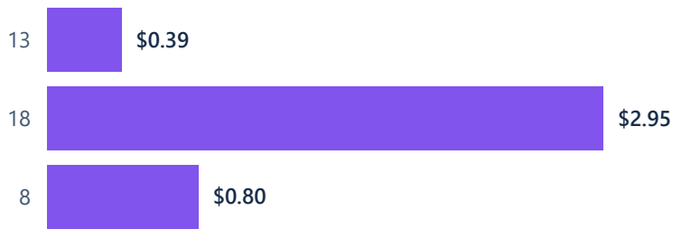

NAVIGATE: Ctrl+click a page button. Click a chart to filter; Ctrl+click adds another selection.

Campaigns with four comparison designs
3

Earlier-match intervals excluding zero
0

Customers assigned in the email experiment
64,000

Earlier-match lift ($ / HH / week)

Campaign estimates after adjustment ($)

Design	13	18	8
1 Raw gap	$34.31	$34.77	$32.10
2 Unmatched	($0.20)	$1.68	($2.24)
3 Recent match	$6.63	$6.27	$3.10
4 Earlier match	$0.39	$2.95	$0.80

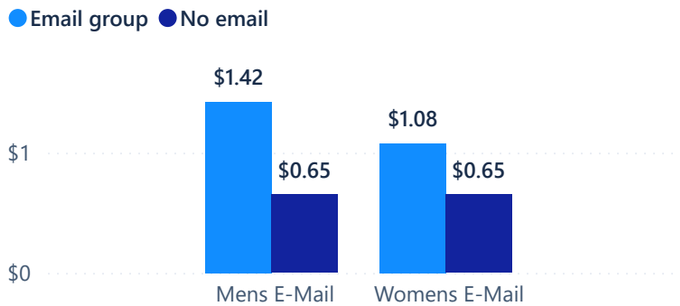

Extra spend per email customer ($)

Households redeeming a coupon (%)

Average spend: email vs no email ($)

Earlier-match lift and 95% intervals

Campaign	Lift ($)	95% interval
13	$0.39	($3.25) to $4.04
18	$2.95	($0.74) to $6.64
8	$0.80	($2.71) to $4.31

All 3 earlier-match intervals include zero. Redemption is engagement, not causal lift. Email is a separate randomized two-week test with a shared control.
